Chief, Language Training

12 November 1959

Plans and Policy Staff

Language Instructors for  
EE Division

1. On 10 November while I was talking with [REDACTED] the Support Chief of EE, he asked that I pass along to you the following "requests":

25X1A9a

(1) EE would like its training officer to stock a small supply of language tapes that can be used on ordinary recorders. The idea here is to make such tapes quickly acceptable for persons, particularly in the senior-grade level, to take home with them for study. Such individuals would, of course, supply their own recorders. George says he is willing to start with a single set of these tapes for elementary and intermediate German.

(2) EE would like to consider the possibility of offering <sup>elementary</sup> ~~intermediate~~ German during working hours in space to be provided by EE. George's thought is that classes would be daily for a one-hour period. It is his feeling that the convenience of classes held right in the division would attract students who are not now able to participate in voluntary training and whom the division cannot release for longer periods of instruction. EE would consider providing the instructors for such courses but would want your material and supervision.
